

# Normann Engineering expands further in Eastern Europe...

40 years of experience in the European market

With its headquarter in Wels (Austria) Normann Engineering also operates in other countries through local branches or sales representatives. The product fields of Normann Engineering include Digital Video, Docsis, optical transmission, measurement technologies and HFC transmission equipment. Not only can Normann Engineering offer distribution but also a wide range of services.

Such services include repairs of different HFC products, product customization or upgrades, calibrations of measuring instruments and more recently refurbishment which are offered in Austria and a service center in Hungary. Even lab services such as comparison measurements or specialized training are available.

With more than 40 years of experience in the market Normann Engineering can count on a team of more than 20 engineers and technicians with particular skills and qualifications.

In particular in Eastern Europe a long list of reference projects concerning implementations of Digital Video headends, HFC, Docsis and Fttx technologies can be named. Moreover customers in Asia and Africa are being served on a project base.

Normann Engineering owns sales offices and service subsidiaries in Slovakia and Hungary. Furthermore in 2017 another branch was opened in Serbia (Belgrade) with 3 technical employees serving the local market as well as those of surrounding countries such as Slovenia, Bosnia, Croatia, Macedonia or Montenegro.

Concerning HFC and optical components Normann Engineering is partnering up with ARRIS, DCT Delta and IPG Photonics in the first place. In the field of headend technologies cooperation with Harmonic, Teleste and Astro has been fruitful over many years. CMTS and cable modems from the manufacturers ARRIS, Technicolor and Cisco are being offered. HFC passive components

Normann Engineering as system integrator for Harmonic and others

are provided by following manufacturers: Commscope, Cablecon, PPC, PCT, Antronix and DKT. Traditional partners for measurement equipment are VIAVI, KWS, SPX Radiodetection and Rohde

and Schwarz.

Normann Engineering is an official partner of ARRIS, Technicolor, Harmonic, VIAVI, Commscope, Cablecon, PPC and many more.

Repair and service facilities in Austria and Hungary
