VOICE

The E-MTA Voice-Over-IP cable modems based on the DOCSIS/Euro-DOCSIS™ 2.0 Specification integrate a wireless functionality. They support voice using the EuroPacketCable 1.5 standard and call control with the EuroPacketCable standard NCS protocol or SIP protocol. High-speed wireless with 802.11b/g makes them true home gateways.

The TWG850-4 is the 4-Ethernet-port model variation of the DOCSIS/EuroDOCSIS 2.0 certified TWG850.

High Speed Wireless Interface

The TWG850-4 supports the 802.11b/g standard for up to 254 PCs at speeds up to 54Mb/s and integrates an internal 32-bit data bus that guarantees superior handling of data traffic.

Enhanced Voice Performance

300 MHz Dual Instruction MIPS32 CPU and DSP Instruction Extensions for VoIP in order to guarantee superior performance. Gateway and Voice operations support data throughput and complex voice codec calls simultaneously. All standard codecs are supported, including the new iLBC and BV16. Different software images are available to support EuroPacketCable™ 1.5 and SIP.

TWG850-4

Wireless and VoIP Cable Gateway

Advanced in Security

To ensure end users and operators with the fullest possible secure solution, Technicolor built in several security mechanisms.

The integrated firewall guarantees users ultimate network security. It minimizes undesired service impact and provides stateful inspection of packets. An integrated Denial of Service (DoS) engine monitors a wide range of attack patterns, and logs potential security breaches to a local cache or remote server.

The TWG850-4 also supports powerful wireless security mechanisms, such as Wi-Fi Protected Access (WPA, WPA2), Wired Equivalent Privacy (WEP) encryption. This allows users to communicate and access data with efficient link quality and the highest level of network security.

On top of that a wireless access control mechanism is built in to prevent unauthorized wireless users from accessing.

To secure data exchange between the gateways and the cable operators' servers, BPI+ communications privacy is used.

Easy to Use, Easy to Install

As all Technicolor gateways, the 4-port Ethernet TWG850-4 is an easy to use, easy to install gateway.

For convenience of the end user, the easy-to-access LEDs provide a clear indication of start-up sequence and connectivity status.

Multiple integrated Web pages allow direct access to the status and settings, including privacy and security information.
