ASTRO   X-2 Twin

UNIVERSAL SIGNAL PROCESSING UNIT WITH TWO SLOTS

The X-2 Twin system completes the ASTRO Head End System with a compact housing with two slots for analog and digital Plug In modules. The system is enclosed in a compact metal housing. The X-2 Twin is a reasonable supplement and easy to maintain.

- For analog, digital, twin and single Plug In modules
- A/V modulator Cards (with X-A/V quad up to eight channels)
- Suitable for adjacent channels to 862 MHz
- Low servicing and maintenance costs
- Integrated output combiner to simplify cabling
- Configuration via KC 3 handheld programmer
- Fully compatible with the modules of the X series
- Wall mounting
- Plug In power supply included
