

REVERSE PATH ANALYSIS SYSTEM

PRICE EFFICIENT SOLUTION FOR RETURN PATH MEASUREMENTS

RFG 6

Return Frequency Generator

Provide six individual switchable frequencies, carrier with 110 dB μ V adjustable.

Possible frequencies

5 MHz	6 MHz	8 MHz	10 MHz	11 MHz	12 MHz	13 MHz	14 MHz	15 MHz	16 MHz	18 MHz
20 MHz	24 MHz	25 MHz	30 MHz	32 MHz	36 MHz	40 MHz	48 MHz	50 MHz	60 MHz	66 MHz

RSU 5-65

Reverse Spectrum Converter

- Receives signals of return path (5-65 MHz) and converts them into a graphical picture in the downstream. Therefore return path signals can be received by a normal TV set.
- No measurement equipment necessary
